

Product details:

Item No.: 844758

Model No.: UL-K17

Technical data:

Input: 12V/1A

CCT: 5000K $\pm$ 500K / 300-500Lm; 4200K $\pm$ 400K / 500-800Lm; 3000K $\pm$ 300K / 200-300Lm

Lighting power: 7.2W $\pm$ 15% (Max)

CRI: >80Ra

Tools list:

1.Soldering iron

2.Electric screwdriver

3.Tweezer

4.Pry piece

Instructions on how to remove the light source:

Note: Please operate following steps when the product is powered off.

Step1: Use a pry piece to open the gap of the plastic cover of the lamp head, exposing the inner lamp board.

Step2: Use an electric screwdriver to remove the screws on the lamp board, and then use tweezers to pick up the lamp board and pull it out.

Step3: Use an electric screwdriver to remove the screws on the main board, and then use a soldering iron to remove the four connecting wires.

Step4: Now the light source was removed without being permanently damaged for verification purposes.
